

Coroplast[®] & IntePro[®] PP Recycling Program

The recycling of plastic is the most effective way to combat adverse environmental impacts. Inteplast Group facilities have plastic reclaim/reprocessing centers in each facility to capture and recycle edge trim, off-grade material, and other non-prime grade material. The 4Rs – reduce, reuse, recycle, and repurpose – are aligned with our lean manufacturing practices.

Features & Benefits

- Our corrugated plastic is made of 100% polypropylene which is 100% recyclable
- Polypropylene is blue bin recyclable. It falls under the #5 resin recyclability code
- Cut-offs and used/printed material is still accepted
- No adhesives or laminates can be on the material in order to be recycled
- No wet material can be recycled
- Corrugated PP plastic from other vendors will also be accepted
- PVC, polystyrene, and other plastics are NOT acceptable for this program
- Material must be stacked on skids with no shrink wrap
- Material must be banded to a skid or baled up. No loose material stacked in a trailer
- The returned material can't exceed the width of the skids it's placed on. Skids can be no wider than 48"
- Inteplast will arrange the freight
- Must be a full truckload, 53' trailer of material
